

Graduate Software Developer Based in Glasgow HQ

Salary: DOE + bonus

We're looking for our next intake of Graduate Developers for our Glasgow HQ to join our innovative development team.

Why SIMUL8 Corporation?

Huge impact. The world's biggest organizations rely on our software. Our customers use our simulation technology to save lives in Healthcare, optimize Manufacturing plants, contribute to advances in Aerospace and so much more. You'll be designing, building, and shipping features that they'll love and enable global change.

Independence. We're hiring great people and letting them do what they do best. We'll support you with lots of mentoring and training, but there's no handholding or micromanaging. From day one you'll get big opportunities and big responsibilities.

Part of a great company. We've grown quickly from a start up to become one of the global power houses of process simulation. But we've kept our start-up vibe, culture, innovative enthusiasm and agility. At SIMUL8 Corporation every person counts and every person makes a difference.

What we offer you

- Salary DOE + bonus
- 33 days holiday a year
- Autonomy in your work & flexible working hours.
- Commitment to your personal training and development, both technical and soft skills
- Commitment to provide you opportunities and resources to work with current and emerging technologies
- Contributory Pension

What will you do?

- Develop awesome new features front to back (using C#, JavaScript, HTML5).
- Work with a team of amazing developers and designers to build simple, beautiful and consistent user experiences for our web and desktop apps.
- Invent and prototype new features, then build, test and ship them in our products.
- Drive the implementation of new technologies which improve our ability to build great products.
- Interact with our customers to determine key solutions (there's no need to apply if you don't want to talk to customers, it's mandatory!).

What are we looking for?

- There's no particular languages you must know, but you must have a strong OO foundation and a desire to learn new languages. Most importantly you must be passionate about programming.
- A working understanding of developing software for the web.
- Basic grasp of agile/lean methods and a passion for the user experience.
- The ability to understand and to make yourself understood by other people.
- Effective self-starter who enjoys problem-solving, with a passion for technology and flexibility to adapt and learn whatever may be required.
- Ready to get stuck in!
